Training of Trainers

Portland, OR
September 13-18, 2009

Community Health Evangelism

Transforming lives, communities, and nations through the seamless combination of evangelism, discipleship, disease prevention, and community-owned development.

The mission of the **Global CHE Network** is to encourage the expansion of transformational ministries worldwide. Our training is aimed at equipping workers for effective ministry in villages and urban slums. Our approach seamlessly integrates evangelism and discipleship with community health and development. Our goal is to transform lives and communities from the inside out.

Community Health Evangelism (CHE) addresses the root causes of poverty, disease, and spiritual darkness by training local leaders to share the gospel and mobilize community action. Communities learn to prevent disease, enhance agriculture, and generate enterprise. Local leaders gain capacity to implement sustainable solutions utilizing local resources and appropriate technologies.

Vital biblical faith is nurtured at every step. CHE integrates the physical and spiritual, revealing the practical power of Christ.

CHE is a proven, practical, and multipliable strategy for ministry. More than 250 different organizations are using CHE in more than 80 countries worldwide.

The Global CHE Network is offering a week-long **Training of Trainers (TOT)** to introduce CHE concepts and provide the tools and “howto’s” to implement and manage a CHE program. The 35-hours of training is done in participatory style using large and small group discussions, various hands-on activities, and methods that can easily be replicated in the village setting. The facilitators for this seminar have more than 45 years combined experience equipping Christian leaders, mission agencies, faith-based organizations, and government agencies around the world to implement successful CHE programs.
